Zhaolei Yin

PRODUCT DESIGNER | UI/UX DESIGNER

Trained in industrial design, now building AI products. I work across physical and digital, from shelf packaging to on-device ML in an iOS app.

WORK EXPERIENCE

Web Designer / SG Supplement

May 2025 – Aug 2025 / Full-time, Rancho Cucamonga, CA

- Launched the company's first website, moving ordering off email so buyers could research products before contacting sales.
- Put ingredient lists, specs, and certifications online, which brought in more inquiries and cut repeat questions to sales.
- Redesigned the logo and visual identity and applied it across the site and sales materials.

Product & Graphic Designer / LeChat Nails

Sep 2022 – Mar 2023 / Full-time, Hercules, CA

- Led packaging and visual identity for 3 nail polish launches, from concept to print-ready files, working with marketing and retail partners to keep the brand consistent from shelf to social.
- Designed packaging and promo visuals for Chill Polish, a color-changing polish co-branded with Coors Light.

Industrial Designer / Dermovia

May 2022 – Aug 2022 / Full-time, Remote

- Produced packaging and campaign materials for 2 skincare launches with the product development team.
- Built the asset library the social team used for every launch that summer, replacing one-off design requests.

PROJECTS

Aurai / *Founder & Product Designer*

2025 – Present

- Designed and built an AI wardrobe-planning iOS app on my own, from first sketch to TestFlight, covering product strategy, UX, and UI.
- Ran usability tests with 35 TestFlight users and refined onboarding and outfit recommendations based on the results.
- Trained an on-device garment recognition model on Core ML (4,400 images, 8 categories, 93% validation accuracy), so photos never leave the phone.
- Designed the recommendation logic and how users act on its suggestions.

CBS News Bay Area / *AR/VR News Experience*

2025

- Designed an immersive news experience where viewers step inside a story instead of watching it.
- Built a predictive layer where changing one variable changes the outcome.
- Named Most Innovative AR/VR Concept.
