

Zhaolei Yin

PRODUCT DESIGNER | UI/UX DESIGNER

I started in industrial design and moved into digital products. Eight years later I still design both, and the overlap is where my work is strongest.

WORK EXPERIENCE

Web Designer / SG Supplement

May 2025 – Aug 2025 / Full-time, Rancho Cucamonga, CA

- Designed the company's first website. Before it, every order came in by email.
- Put the ingredient list, specs, and certifications online so buyers could check them without emailing sales first.
- Redesigned the company logo and applied it across the site and other materials.

Product & Graphic Designer / LeChat Nails

Sep 2022 – Mar 2023 / Full-time, Hercules, CA

- Owned packaging and visual identity for 3 nail polish launches, from concept to print-ready files.
- Designed packaging and promotional visuals for Chill Polish, LeChat's color-changing nail polish made with Coors Light.
- Worked with marketing and retail partners to keep the brand consistent from shelf to social.

Industrial Designer / Dermovia

May 2022 – Aug 2022 / Full-time, Remote, Irvine, CA

- Produced packaging and campaign materials for 2 skincare launches, working alongside the product development team.
- Built the asset library the social team used for every skincare launch that summer.

PROJECTS

Aurai / Founder & Product Designer

2025 – Present

- Designed and built an AI wardrobe planning app on my own, from first sketch to a working iOS build. Currently in TestFlight with 35 testers.
- Set the product direction and designed the interface, including onboarding and the recommendation logic.
- Trained the garment recognition model myself, 4,400 images across 8 categories at 93% validation accuracy, running on device so photos never leave the phone.

CBS News Bay Area / AR/VR News Experience

2025

- Designed an immersive news experience where viewers step inside a story instead of watching it.
- Built the predictive layer, where changing one variable in the scene changes the outcome.
- Named Most Innovative AR/VR Concept.
